

Business Management System (BMS) Policy

It is the policy of Ireland Brown Construction's to undertake a range of construction projects paying the highest of regard to Safety, Environmental & Quality standards. It is Ireland Brown Construction's aim to demonstrate and ensure Safety, Environmental & Quality compliance in according to AS/NZS 4801: 2001, AS/NZS ISO 14001:2004 and AS/NZS ISO 9001:2000, the standards specified in relevant contracts, codes of practice and any applicable Occupational Health & Safety (OH&S) and Environmental Acts, legislation and regulations.

Staff input and involvement is essential in identifying and mitigating workplace hazards and risks in order to achieve a safe work and environmentally sustainable environment. Management will ensure all staff and contractors are inducted to become familiar with safe work methods and risk management techniques.

Ireland Brown Construction's objectives are to promote safety, environmental and quality awareness and to optimise client satisfaction on all projects. This will be achieved through setting measurable objectives and targets, focusing on these at every level, and the elimination of work related injuries, illnesses and pollution. We will also ensure that all staff and contractors understand our policy and their responsibilities for maintaining the highest level of quality and safety performance.

We continuously monitor our Business Management System to ensure its ongoing suitability, and improve our operations to achieve excellent time, safety, environmental, quality and cost standards. This also enables us to respond to client concerns in an efficient and effective manner ensuring client satisfaction.

Ireland Brown Construction's Directors regularly review this policy and the Business Management System as a whole to ensure it remains relevant and appropriate. This policy is available to interested parties upon request.
